

Auskick and Juniors Set Up – Wagener Oval

Aim to have the field and goals set up 10-15 minutes before kick-off time

Fields

- If you need 4 fields for Auskick then you set up one each going across-ways inside each 50m arc and one each going lengthwise along each wing
- Fields should be about 55 paces long for U5/U6 games, about 65 paces long for U7 games and about 70-75 paces long for U8 games
- Push them out about 10 paces between games for any fields which are moving from being used for an U6 game to an U7 game etc
- When the older age groups (U9s and up) come along they should be able to take over and just keep extending fields until you get to U11s where they'll go to a single field lengthwise from one end to a little over halfway
- Err on the side of larger fields to try to make it just a little less of a scrum, but if numbers are thin then just make them a bit smaller

Goals

- Use the Hart poles or the larger poles depending on preference (although we don't have enough larger poles for more than one or two fields and the Hart poles are easier to carry around)
- Use 6 paces between posts for the goals and behind posts
- Cones are then distributed around to form a roughly oval-shaped sideline
- Sidelines can be marked fairly closely (e.g. cones about 7 paces apart)
- If games are located with 2m of fixed goals post pads must be applied

If the canteen is operating, please discuss with the Canteen Coordinator if any assistance is required with setting up.

Thank you for your help!
